

**Are you an final year undergraduate or master student interested in research?**

**Looking for a unique opportunity to explore the field of Materials Science & Engineering?**

**Do you want to be part of an international and multidisciplinary research group?**

- 3 months during summer
- Open choice of research topics
- Gross stipend of 600€/month

## What past fellows say about the experience

During the first day, my expectations changed completely for the better. **I was enrolled in a real project**, with real meetings, and with other many researchers. *JG, 2015 Fellow*

There are a lot of **students from around the world** working in very different topics and they show you what they are doing, so you can learn things at any moment. *MV, 2015 Fellow*

IMDEA Materials would be a great place to continue my studies to a PhD level. *DB, 2016 Fellow*

Rather than having a secondary role in a particular project, I was given the opportunity to be the main developer [...]. I am overall very happy with the results of my effort, as **I have contributed positively to the group** and some of my work might even be published in the coming year. *IL, 2016 Fellow*
